LET THE NUMBERS SPEAK

**Breast Cancer Screening.**
More than 900 local women are less likely to die from breast cancer after our 2011 improvements than they were in 2010. THIS is why we come to work!

**Colorectal Cancer Screening.**
The 2,558 patients screened in the past 12 months are less likely to ever need chemotherapy. Talk about a brighter future!

**Tobacco Advice. Tobacco Screening.**
91% of our patients who smoke are counseled on strategies to eliminate or reduce cigarette use. Inhale some happiness!

**Breast Cancer Screening.**
Keep up the good work! In the past year, 629 more patients are more likely to be aware of, and treated for, weak bones. No putting on the breaks now!

**Osteoporosis Screening.**
87.5% of eligible patients age 65 and older have received the vaccine. At 90%, even those who haven’t had the shot are more protected. We’re close and getting closer!

**Cervical Cancer Screening.**
The 87% of women who are screened for cervical cancer every year are more likely to play with their grandkids. THAT is why we do what we do!

**Adult Pneumococcal Vaccine.**
87.5% of eligible patients age 65 and older have received the vaccine. At 90%, even those who haven’t had the shot are more protected. We’re close and getting closer!

**Saving lives. That’s what we do.**
There’s no more important quality measure, and our team is #1 in Wisconsin!

**Diabetes Care.**
Our patients have fewer complications, greater control and less chronic disease. They are living well, longer!

**Uncomplicated Hypertension.**
More than 4 of 5 patients with high blood pressure have their BP well-controlled. Those are “wow” numbers!

**Let the numbers speak!**
We’re delaying and preventing heart disease. Now there’s a beat we can all get behind!
